

Hosted and Managed Altiplano Service Activation

An essential element of Nokia's best-of-class fiber to the home solution is their platform for activating fiber devices, Altiplano Access Controller. Altiplano offers advanced tools used by the largest of broadband providers to ensure fast and accurate service activation and a premium customer experience. However, Altiplano can also be daunting to set up, operate and manage if you do not have the technical resources and in-house expertise.

Let ZCorum do the heavy lifting for you with our Hosted and Managed Altiplano service. Not only will you avoid the initial setup of the application and server environment, but you never have to worry about the ongoing maintenance of the operating system, servers, or software.

ZCorum will set up and host your Altiplano instance, configure the application for your service activation needs, and provide ongoing management of your device configurations of the application. And, you can be confident in our high-availability hosting environment. Your application will be hosted in a world class Data Center with multiple redundant backbone connections, power feeds, UPS systems, and environmental controls.

Hosted Altiplano Benefits:

- Fully-Managed, Cloud-based Hosting
- No Technical Experience Needed
- Zero Upfront Equipment Costs or Ongoing Maintenance
- A Secure and Robust Environment that Scales as You Grow
- Round-the-Clock Support Ready to Assist You
- Initial Setup of Device Configurations and Ongoing Modifications
- Full Access to the Altiplano Software and its Advanced Features
- Access to ZCorum's Service Activation Interface if Needed

**Altiplano is a trademark of Nokia.*
