

Attract and Retain Customers with VoiSelect Digital Voice

More and more consumers are turning to Voice over Internet Protocol (VoIP) services to take charge of their phone service. ZCorum's VoiSelect Digital Voice service can help you quickly and easily enter the growing VoIP market and help your customers lower their phone bills and save money.

Attract and Retain Customers

VoiSelect empowers you to add value for your broadband customers, while increasing revenue per subscriber and helping to reduce customer churn. With VoiSelect, you can bundle services and put them on one convenient bill, decreasing the likelihood that your subscribers will switch to a competitor.

Simple to Deploy and Feature-Rich

VoiSelect allows you to provide desirable calling features with little or no capital investment. VoiSelect offers all the traditional calling plan features – and more – without the extra charges and works over your existing broadband network with no additional equipment needed. The setup for your customers is easy. Once the service is turned on, they simply connect a cable modem with an integrated telephone adapter or a separate adaptor to your modem.

Commercial Digital Voice

Operators can serve local businesses with VoiSelect commercial voice solutions. A ZCorum hosted IP-PBX service allows small and medium-sized business subscribers to enjoy the benefits of a PBX without investing in costly equipment. Business subscribers that already have a PBX can lower their monthly phone bill by switching from traditional PRI lines to VoiSelect SIP trunks.

Comprehensive Support Services

VoiSelect is backed by ZCorum's US-based technical support team, and is available 24 hours a day by phone, email, and online chat. ZCorum can optionally provide support for the subscriber's data connection, providing a single point of contact and further increasing customer satisfaction with your service.

To schedule a complete consultation on your broadband network and how VoiSelect can help you increase revenue, contact ZCorum at 800.909.9441 or online at www.zcorum.com
